

Asynchronous Activity 1

KNIME Project Upload to GitHub - Evidence PDF

Student: Paolo Gorospe
Course and section: CS0065 - Intelligent Systems, AN43
Repository: SatoruAkaibara/Gorospe-Paolo-CS0065-AN43
Date: 16 September 2026

This evidence record documents the project-folder preparation, Git commit and push, and public GitHub verification required by the student guide.

Required project files

File	Purpose
DemoEarlyWarningTool.knwf	Exported KNIME workflow package
student_performance_knime.csv	Included dataset for CSV Reader configuration
README.md	Project, algorithm, and run instructions
Gorospe_Paolo_KNIME_GitHub_Evidence.pdf	This step-by-step evidence document

Screenshot 1 - Project folder prepared

The required project folder contains the exported workflow, dataset, README, and this evidence PDF.

```
C:\...\work\repo\DemoEarlyWarningTool

Mode Length Name
----
-a--- 799762 DemoEarlyWarningTool.knwf
-a--- 1920 README.md
-a--- 918 student_performance_knime.csv
-a--- [PDF] Gorospe_Paolo_KNIME_GitHub_Evidence.pdf
```

Caption: The folder was organized using the required DemoEarlyWarningTool name and the exact required filenames.

Commands used - Git initialized, committed, and pushed

The project files were staged in the repository, committed on the main branch, and pushed to GitHub without force-pushing.

```
$ git status --short

M README.md

?? DemoEarlyWarningTool/

$ git add .

$ git commit -m "Add KNIME workflow and project files"

[main 230e29b] Add KNIME workflow and project files
4 files changed, 72 insertions(+)

$ git push -u origin main

To https://github.com/SatoruAkaibara/Gorospe-Paolo-CS0065-AN43.git
18e07af..230e29b main -> main

$ git add .

$ git commit -m "Use supplied student performance dataset"

[main bd8dd16] Use supplied student performance dataset

$ git commit -m "Document supplied CSV configuration"

[main c2fc164] Document supplied CSV configuration

$ git push
```

Caption: The command sequence created the project history and pushed the final CSV and documentation updates to the remote repository.

Screenshot 3 - GitHub repository root

Equivalent GitHub evidence for the commands above: the public repository root shows the DemoEarlyWarningTool project folder and the latest commit on main.

student_performance_knime.csv

README preview: Student Early Warning Tool Using KNIME

Caption: This is the GitHub-equivalent visual evidence for the required Demo folder contents, including the supplied CSV and the evidence PDF.

Final verification checklist

- [x] Repository opens using the submission link
- [x] Repository visibility is Public
- [x] DemoEarlyWarningTool folder is visible
- [x] Workflow filename ends in .knwf
- [x] README.md is present with no .txt suffix
- [x] Dataset is included in the Demo folder
- [x] README identifies project, workflow, algorithm, and run steps
- [x] Evidence PDF is included and opens from GitHub
- [x] Latest project commit is visible on GitHub
- [x] Workflow download/import and CSV Reader configuration instructions are documented
- [x] Git commands and equivalent GitHub screenshots are included

MS Teams action: paste the repository root link below into the assigned activity and select Turn in after reviewing the online files.
